

## Workshop

# Kimberlite evaluation: Essentials for understanding primary diamond deposits

This workshop includes lectures and practical exercises that give **geologists and mining professionals** the opportunity to:

- Examine and classify mantle xenoliths, kimberlite specimens and diamonds
- Review and interpret microdiamond data sets
- Investigate mining methods
- Analyze project economics and quantify risk and uncertainty

## University of Toronto

**Saturday, February 28 - Sunday, March 1, 2015**
